

Live Audio Record & Transcribe in latakoo Mobile

1. Open the latakoo mobile app and login
2. Go to **Capture**
3. Scroll to the **Live Audio Stream** recording option
4. Click the **Settings icon** in the top left corner
5. Set your **filename**
6. Set your streaming destination **network(s)**
7. Click **Go Live** to begin live audio recording and transcribing
8. Click the **stop button** to end the live recording & transcription. Once stopped, the file will behave like any other upload (be ingested through HUB, be searchable, be playable, etc). The transcription for the finished recording will automatically run again to ensure the highest accuracy possible.
9. Optional: rename the file once you are done recording and transcribing
